Opportunity Details

Opportunity Information

Title

2026 Community Health Improvement Grants (STD) TX-Houston Baylor

Description

Through the Community Health Improvement Grants program, CommonSpirit Health hospitals fund programs and services delivered by collaborating 501(c)3 non-profit organizations, to address significant needs in the hospitals' community health needs assessments and implementation strategies. Community Health Improvement Grants help to improve community health and enhance local service systems via restricted charitable contributions for defined projects.

Participating hospitals include those of Catholic Health Initiatives, Dignity Health and Virginia Mason Franciscan Health. These hospitals are all members of CommonSpirit Health.

Some hospitals located close to one another collaborate on a single grant process, and do not each accept separate proposals. Consult the "Hospital List for Applicants" linked below and on the grant program website for specific information about participating hospitals.

Submission Timeline Additional Information

Hospitals' Local Grant Leaders may, in their sole discretion, request that a submitted application be revised prior to or during the review process.

Allow Multiple Applications

Yes

Other Submission Requirements

Review the Grant Information and Resources Video and the AmpliFund Applicant Portal Training Video at <https://www.commonspirit.org/impact/community-health-initiatives/community-grants> for detailed guidance on preparing and submitting an application.

All applicants should consult the Hospital List for Applicants and other documents linked below before planning their proposals and completing application forms. These documents include information necessary to submit an application that meets program criteria, including: minimum and maximum grant award amounts by hospital, Local Grant Leader contact information, and links to hospitals' community health needs assessments and significant community health needs.

Hospitals and hospital clusters each have specific minimum and maximum individual grant award amounts.

The grant program only considers proposed projects that address one or more significant needs in the hospitals' community health needs assessments.

Question Submission Information

Question Submission Email Address

communitygrants@commonspirit.org

Question Submission Additional Information

Questions about local hospitals' grant priorities and processes should be addressed to the appropriate Local Grant Leaders noted on the Hospital List for Applicants linked below.

General questions about the Community Health Improvement Grants program can be directed to communitygrants@commonspirit.org.

Applicants should download and read the documents linked here, as they contain necessary and valuable information for the preparation and completion of grant applications.

Eligibility Information

Additional Eligibility Information

APPLICANT ELIGIBILITY CRITERIA

Applicants must be IRS 501(c)3 non-profit organizations, or have a fiscal agent that is a 501(c)3 organization and capable of administering grant project funds. Applicants must provide an IRS Determination Letter documenting 501(c)3 status and be in good standing.

Applicants and partners must have a philosophy and services not inconsistent with the mission and vision of CommonSpirit Health (<https://www.commonspirit.org/about-us/mission-vision-and-values>).

PROPOSAL ELIGIBILITY CRITERIA

Proposals are for projects that address one or more significant health needs in the hospital's most recent community health needs assessment (CHNA), with sustained project activity over the course of between 9 and 12 months. Prospective applicants should consult the Hospital List for Applicants linked above and review the relevant CHNA report before applying.

The program is intended both to support the delivery of services and to strengthen collaborative service systems. Consistent with this aim, proposals must include collaborating partner organizations other than the hospital with distinct, complementary and substantive project roles. Collaborating partner organizations ("partners") can be non-profit or public organizations.

Partners may receive a portion of the grant that is awarded to the applicant, for costs of their project activities. This is communicated by applicants in the proposal budget. Distribution of any awarded funds to partners is the responsibility of the recipient.

People and communities to be served are within the hospital's service area and include identified underserved or vulnerable populations, to help address health inequities.

People to be served can include members of the community at-large, patients of CommonSpirit Health entities or both. (If any CommonSpirit patient Protected Health Information is to be shared in the course of proposed activities, appropriate patient authorization procedures and/or Business Associate Agreements may be required of funded projects to ensure compliance with the Health Insurance Portability and Accountability Act (HIPAA).)

Proposals convey how their proposed projects reflect one or more of the following principles: focus on disproportionate unmet health-related needs (advancing health equity); emphasize prevention, including activities that address social determinants of health; contribute to a seamless continuum of care; build community capacity; and demonstrate collaboration.

Proposal budgets can include equipment purchases of up to \$5,000 and computer equipment up to \$2,500, with the

total not to exceed 50% of funds requested.

Proposals are for one year periods only. Applicants can apply in subsequent years for substantially the same or similar scopes of work if the CHNA significant health need priorities remain and recipient performance and outcomes meet or exceed expectations. Projects delivering substantially the same or similar activities will not be funded for more than four consecutive years.

Ineligible proposals include those for unrestricted general operating support, event sponsorships and activities less than 9 months in duration, capital projects (e.g., buildings, renovations), and lobbying or political campaigns.

Community Assistance and Transition Care of Houston (CATCH)**Partner #1 Contact Person**

Janice Sparks, Ph.D.

Partner #1 Email

janice.sparks@catchgh.org

Partner #1 Website

<https://catchgh.org/>

Partner #1 Mission and Principal Activities**Our Mission**

Build a stronger and healthier community for all.

Our Vision

Through innovation and collaboration, CATCH will improve the health outcomes of our clients through empowerment, education, and support.

Principal Activities

CATCH has been a cornerstone of support for the Greater Houston area since 2011, formally establishing itself as a Community Care Hub in 2023. Focused on addressing non-medical drivers of health, CATCH supports older adults, individuals with disabilities, and caregivers through a network of public health organizations and entities.

Our work ensures access to services such as nutrition, transportation, and care coordination, ultimately empowering clients to lead healthier, more self-sufficient lives.

Partner Organization #2**Partner #2 Org. Name**

Harris County Area Agency on Aging (HCAAA)

Partner #2 Contact Person

Paula Johnson, Bureau Chief

Paula.Johnson@houston.tx.gov

Partner #2 Website

<https://www.houstonhealth.org/services/aging>

Partner #2 Mission and Principal Activities**Mission**

To promote well-being and quality of life with dignity for older adults in our community. To serve the community as an embodiment of aging advocacy leading to meaningful, dignified, and independent lives for older adults.

Vision

To support older adults, their families, and caregivers to achieve safe, healthy, independent, and self-reliant lives.

The Harris County Area Agency on Aging (HCAAA) is the Focal Point for older adults in the Houston area and has been since the onset of the Older Americans Act in 1965. The HCAAA is committed to facilitating access to services and benefits that help older adults age in place with independence and dignity regardless of race, creed, gender, religion, disability, or financial status.

Partner #3 Mission and Principal Activities

Our goals are to recruit and train high-quality students to contribute to public health, encourage the discovery and dissemination of scientific knowledge, and improve the public's health through community collaboration and engagement.

Home to diverse communities that reflect the future population of the US, students at the UTHealth Houston School of Public Health in Houston are uniquely positioned to gain hands-on experience on local projects with national significance. Our faculty are pioneering radical solutions for imminent public health problems and provide the tools and resources that will push you to think critically and creatively both in and out of the classroom. This is where academic rigor meets real-world application.

PARTNER ORGANIZATIONS' AGREEMENT TO PARTICIPATE. For applications to be considered, partner organizations are required to have agreed to participate. Have all partner organizations agreed to participate in the project proposal as submitted?

- ☒ Yes
☐ No

Have the applicant or any partner organizations received a Community Health Improvement Grant in the past three years?

- ☒ Yes
☐ No

Needs, Summary and Population

Needs Addressed, Project Summary and Population Served

INSTRUCTIONS: Indicate the community health needs (from the hospital's Community Health Needs Assessment) that the project will address, provide a summary of proposed activities, and describe the population to be served. On the next form, applicants will provide a more detailed description of project activities and project outcome goals.

COMMUNITY HEALTH PRINCIPLES. The grant program is committed to advancing specific community health principles. In your program description and other responses, convey how the proposed project reflects one or more of the following: 1) focus on equity in unmet health-related needs; 2) emphasize prevention, including activities that address social drivers of health; 3) contribute to a seamless continuum of care; 4) build community capacity; and 5) demonstrate collaboration.

PRIMARY COMMUNITY HEALTH NEED ADDRESSED. First, locate the hospital to which you are applying in the Community Health Needs Assessment (CHNA) sheet linked in the overview section. Then, select the need below that is on the hospital's list AND best matches the primary need addressed by your proposal. (Note: Needs in CHNAs will be similar but not identical to those below. Select the best match.)

- ☐ Access to Care/Services
- ☐ Behavioral Health (mental health, substance use)
- ☐ Cancer
- ☐ Chronic Disease
- ☐ Disaster Preparedness (incl. heat, wildfire, flood, extreme weather)
- ☐ Health Behaviors
- ☐ Healthy Aging
- ☐ Infectious Disease
- ☐ Maternal & Child Health
- ☐ Oral Health
- ☐ Preventive Practices
- ☐ Sexually Transmitted Infections
- ☐ Social Drivers of Health - Employment/Poverty
- ☐ Social Drivers of Health - Food/Hunger
- ☐ Social Drivers of Health - Housing/Homelessness
- ☐ Social Drivers of Health - Physical Environment
- ☒ Social Drivers of Health - Social Needs
- ☐ Social Drivers of Health - Transportation
- ☐ Social Drivers of Health - Other
- ☐ Unintentional Injury
- ☐ Violence and Injury

SECONDARY COMMUNITY HEALTH NEED ADDRESSED. Select the need below that is in the hospital's CHNA and is the second-best match to your proposal.

- ☒ Access to Care/Services
- ☐ Behavioral Health (mental health, substance use)
- ☐ Cancer
- ☐ Chronic Disease
- ☐ Disaster Preparedness (incl. heat, wildfire, flood, extreme weather)
- ☐ Health Behaviors
- ☐ Healthy Aging
- ☐ Infectious Disease
- ☐ Maternal & Child Health
- ☐ Oral Health
- ☐ Preventive Practices
- ☐ Sexually Transmitted Infections
- ☐ Social Drivers of Health - Employment/Poverty
- ☐ Social Drivers of Health - Food/Hunger
- ☐ Social Drivers of Health - Housing/Homelessness
- ☐ Social Drivers of Health - Physical Environment
- ☐ Social Drivers of Health - Social Needs
- ☐ Social Drivers of Health - Transportation
- ☐ Social Drivers of Health - Other
- ☐ Unintentional Injury

☐ Violence and Injury

PROJECT SUMMARY. Provide a concise description of the proposed project, addressing: what will be done, for whom, to address what need, to achieve what outcome or result. (Example: "The project will address the need for cancer education and prevention among newer low-income residents in our county, by partnering with a cultural center and a community college to conduct outreach, deliver evidence-based education, and connect at-risk people with screening and other services. It will deliver educational content to at least 1,000 people and connect at least 70% of referred individuals to indicated screenings. It will measure increases in knowledge using pre- and post-tests, and track screening referral success rates.")

Community Assistance and Transition Care of Houston (CATCH) proposes to enhance and expand a comprehensive community referral and social needs screening initiative that identifies health-related social needs and addresses those needs through a network of community-based organizations (CBO) to improve health outcomes for patients/clients in and around Harris County, TX. As a community care hub, CATCH will coordinate with healthcare and community-based partners to identify individuals with unmet social needs and connect them to appropriate services. This initiative aims to improve health outcomes, reduce healthcare costs, and strengthen community support systems. This funding will support CATCH in enhancing infrastructure and operations, improving program development, and fostering collaborative partnerships, particularly for seniors, low-income families, and communities of color. CATCH aims to process at least 180 referrals for triage of Social Drivers of Health (SDOH) with the goal of identifying at least 18 high-need clients who could benefit from more intensive case management services during the grant period, including home visits and follow-ups for those with multiple social needs.

POPULATION SERVED. Describe who the project will serve, including both: 1) key demographic, health and social characteristics; and 2) the geographic area (e.g., counties, municipalities).

This project area comprises ten Zip codes, nine in Harris County and one in Fort Bend County, Texas, that show significant diversity in race, income, housing status, and social vulnerability. Furthermore, demographic analyses show significant unmet demand for coordinated aging services, with higher-than-average rates of cancer and diabetes, and 10-15% of seniors lacking needed medical care due to cost or access barriers.

Many areas in the listed service zip codes are largely occupied by Hispanic and Black communities. Selected ZIP codes like 77093, 77091, and 77016 have faced chronic underinvestment and health disparities.

The median household incomes in most of these zip codes are below the average for Texas. Employment is primarily in the service and retail sectors. The health outcomes in these communities closely correlate with socioeconomic status, where environmental and SDOH play pivotal roles in the prevalence of chronic diseases and mortality rates.

We are committed to collecting and using data describing the communities served by our grants. Please complete the questions below for your proposed project.

ETHNICITY-RACE (1st). Select the category that best describes largest segment of those the project anticipates serving.

- ☒ Hispanic or Latino (HoL)
- ☐ American Indian or Alaska Native (Non-HoL)
- ☐ Asian (Non-HoL)
- ☐ Black (Non-HoL)
- ☐ Native Hawaiian / Pacific Islander (Non-HoL)
- ☐ White (Non-HoL)
- ☐ Two or More Races (Non-HoL)
- ☐ Other
- ☐ Unknown / Declined

ETHNICITY-RACE (2nd). Select the category that best describes second-largest segment of those the project anticipates serving.

- ☐ Hispanic or Latino (HoL)
- ☐ American Indian or Alaska Native (Non-HoL)
- ☐ Asian (Non-HoL)
- ☒ Black (Non-HoL)
- ☐ Native Hawaiian / Pacific Islander (Non-HoL)
- ☐ White (Non-HoL)
- ☐ Two or More Races (Non-HoL)
- ☐ Other
- ☐ Unknown / Declined

AGE (1st). Select the age range that best describes largest segment of those the project anticipates serving.

- ☐ 0 - 17 years
☐ 18 - 44 years
☐ 45 - 64 years
☒ 65 years and over
☐ All ages

AGE (2nd). Select the age range that best describes second-largest segment of those the project anticipates serving.

- ☐ 0 - 17 years
☐ 18 - 44 years
☒ 45 - 64 years
☐ 65 years and over
☐ All ages

GENDER. Select the gender that best describes largest segment of those the project anticipates serving.

- ☐ Female
☐ Male
☒ All genders

ZIP CODES. List up to ten ZIP codes in which the majority of project activities and services will be delivered. (Note: This field is required.)

77009
77036
77082
77083
77407
77084
77449
77093
77016
77022

Project Sustainability

Describe how the project will be sustained through organizational and financial commitments over the next three years.

CATCH is a Community Care Hub (CCH). CCHs are a promising solution for alleviating the challenges around coordination of care, scalability, and impact. A CCH is a legal entity (or arm of an existing legal entity) that remains community-focused as it organizes and supports a network of CBOs providing the services that address HRSNs. As a CCH, CATCH has been building its operational infrastructure that will be pivotal to ensuring financial sustainability. This grant will help CATCH advance its operational infrastructure. With that infrastructure, CATCH will be able to work with organizations such as health plans (e.g. Aetna), healthcare providers (e.g. Oak Street Health), and its network of CBOs (e.g. Area Agency on Aging) to establish shared processes, demonstrate measurable impact, and test fee schedules that enable growth and scaling services. In this way, CATCH has a plan for diversifying and pursuing future revenues that will support scaling of its infrastructure and services.

Hospital Role in Project and Protected Health Information (if any)

Will project activities involve the grant-making hospital's participation in services or activities? (NOTE: This is not required or an expectation of project proposals. However, it is important to know whether the proposed project intends for the hospital to participate directly.)

- ☒ Yes
☐ No

Describe specific ways that project activities will involve the hospital's participation.

Like any other hospital or clinic with which CATCH collaborates to receive referrals, Baylor St. Luke's Medical Center (BSLMC) can play a key role in identifying patients at the time of discharge who need enhanced support. BSLMC, will share minimally necessary PHI in order to operationalize a referral to CATCH. From there, CATCH contacts the patient/client and is responsible for conducting an initial assessment and ongoing person-centered care plan focused on addressing their SDOH needs.

SERVICE TO COMMONSPIRIT HEALTH PATIENTS AND USE OF PROTECTED HEALTH INFORMATION. Indicate whether the project will serve CommonSpirit Health patients and involve applicant organization's use of Protected Health Information (PHI), including patient demographic data (e.g., name, address, birthdate). This is most likely in cases where the hospital may be referring patients to the applicant organization. Successful applicants whose projects involve PHI must comply with Health Insurance Portability and Accountability Act (HIPAA) provisions. CommonSpirit Health will provide direction and assistance as needed.

- ☒ Yes, project will involve use of Protected Health Information of CommonSpirit Health patients
- ☐ No, project will not involve use of Protected Health Information of CommonSpirit Health patients
- ☐ Unsure at this time whether project will involve use of Protected Health Information

Project Activities and Outcome Goals (standard grants)

Instructions

Provide specific but concise descriptions of project activities, goals for numbers of persons to be served, and measurable outcome goals. Applicants are encouraged to carefully plan their entries in this section, which serves as the project's "roadmap" and is an important basis for reporting.

Project activities should describe the applicant's and partner organizations' distinct, complementary and substantive project roles.

At least two project activities and one project outcome goal are required. (It is optional to include up to five project activities and three outcome goals.)

Project Activity #1

DESCRIPTION. Describe a project activity or service, including the frequency or duration of the activity and the resources (e.g., staff, materials, partner organizations' actions) that will be used.

RECEIVE & TRIAGE REFERRALS

CATCH aims to process and navigate 180 referrals for intensive case management services that enhance and improve access to care, and provide supportive services that meet the clients' SDOH needs. This activity will take place from April 1, 2026, to March 31, 2027.

CATCH will use an online portal for seamless referral submissions from Community-Based Organizations (CBOs), Health Systems, and Healthcare Organizations. Through these collaborations, patients will be referred to CATCH for comprehensive screening and support. Upon receiving a referral, CATCH will leverage the expertise of CHWs to offer essential non-medical support to individuals identified through a screening process as having one or more SDOH needs.

CATCH will assist in the following zip codes: 77036, 77082, 77083, 77407, 77084, 77449, 77093, 77016, 77022, 77009, with a focus on older adults and people with chronic illnesses to implement a collaborative approach supported by existing innovative digital tools. Funds from this grant will further CATCH's existing efforts to establish its Community Care Hub referral and intensive case management operations, and in doing so, increase CATCH's reach and capacity to further serve underrepresented populations within the Houston metro area.

The project will run from April 1, 2026, to March 31, 2027.

NUMBER of PERSONS SERVED (or Units of Service). Enter the number of persons to be served or units of service to be delivered by this activity.

180

Project Activity #2

DESCRIPTION. Describe a project activity or service, including the frequency or duration of the activity and the resources (e.g., staff, materials, partner organizations' actions) that will be used.

REFERRAL MANAGEMENT

Upon receipt of a partner referral, the CHW determines the referral pathway based on the individual's needs. A referral will follow one of two pathways: either the Information, Referral, and Assistance (IR&A) pathway or the more intensive case management pathway.

If the referral requires only IR&A, the individual will be connected to the appropriate resources. For clients who require case management, the CHW will work with the client to co-create a person-centered care plan that aligns with their values. The CHW will support the client in accessing needed resources, applying for eligible benefits, and will check in regularly to monitor, offer support, and document the client's progress toward achieving the goals outlined in the care plan.

Overall, the total time spent per client will depend on the referral pathway. The IR&A referral may require 20 minutes to an hour of assistance. In comparison, the case management pathway may vary from three to four hours per month, depending on the client's needs.

CATCH already has experience working towards this operating model. For the past three months, it has been supporting the Harris County Area Agency on Aging, one of its "in-network community-based organizations", in

receiving referrals and then triaging those referrals into the appropriate service based on the complexity of needs and appropriate intensity of services.

The project will run from April 1, 2026, through March 31, 2027.

NUMBER of PERSONS SERVED (or Units of Service). Enter the number of persons to be served or units of service to be delivered by this activity.

180

Project Activity #3

DESCRIPTION. Describe a project activity or service, including the frequency or duration of the activity and the resources (e.g., staff, materials, partner organizations' actions) that will be used.

CATCH will engage health plans, health systems, local government, and CBOs in collaboration conversations to increase the referrals that those organizations send to CATCH. CATCH has been focused on establishing referral pipelines across the community for the past year. As such, CATCH is in active discovery conversations with one health plan, two physician groups, two health clinics, and two CBOs. In this way, this grant will further accelerate CATCH's ability to successfully establish referral pipelines, but without being responsible for starting new work that does not already align with CATCH's strategic priorities and the community's needs.

The project is currently in progress, and funding from this grant will provide resources to enhance its advancement from April 1, 2026, to March 31, 2027, as well as support the goal of contracting with at least three organizations for referrals.

NUMBER of PERSONS SERVED (or Units of Service). Enter the number of persons to be served or units of service to be delivered by this activity.

3

Project Activity #4

DESCRIPTION. Describe a project activity or service, including the frequency or duration of the activity and the resources (e.g., staff, materials, partner organizations' actions) that will be used.

NUMBER of PERSONS SERVED (or Units of Service). Enter the number of persons to be served or units of service to be delivered by this activity.

Project Activity #5

DESCRIPTION. Describe a project activity or service, including the frequency or duration of the activity and the resources (e.g., staff, materials, partner organizations' actions) that will be used.

NUMBER of PERSONS SERVED (or Units of Service). Enter the number of persons to be served or units of service to be delivered by this activity.

Project Outcome Goal #1

DESCRIPTION. Describe an outcome goal (an improvement in the condition of people served - such as health status, access to care, behaviors or knowledge - or in local service systems) that is specific, measurable, achievable, relevant, and time-bound (SMART). Below, enter a measurement as either a number or a percentage. (E.g., If the outcome goal is that at least 80% of project participants will exhibit the described improvement, enter .80 in the percent field below.)

Within the funding period (April 1, 2026, to March 31, 2027), CATCH will establish partnerships with three additional organizations, such as community-based organizations (CBOs) and healthcare providers, to address SDOH and measurably increase clients' access to care.

MEASUREMENT (number). Outcome to be achieved, expressed as a number. (OR, use the percent field below.)

3

MEASUREMENT (percent). Outcome to be achieved, expressed as a percentage entered as a decimal. (OR, use the number field above.)

Project Outcome Goal #2

DESCRIPTION. Describe an outcome goal (an improvement in the condition of people served - such as health status, access to care, behaviors or knowledge - or in local service systems) that is specific, measurable, achievable, relevant, and time-bound (SMART). Below, enter a measurement as either a number or a percentage.

During the funding period from April 1, 2026, to March 31, 2027, CATCH will receive, assess, and refer at least 180 individuals with identified social drivers of health (SDOH) needs to suitable community-based resources. CATCH will document and track client demographics, the health-related social needs (HRSN) identified, and the resolution rates for each HRSN. Success will be measured by tracking 100% of submitted referrals and documenting their follow-up and resolution status, which will include categories of unresolved, paused, in progress, and resolved.

MEASUREMENT (number). Outcome to be achieved, expressed as a number. (OR, use the percent field below.)

180

MEASUREMENT (percent). Outcome to be achieved, expressed as a percentage entered as a decimal. (OR, use the number field above.)

Project Outcome Goal #3

DESCRIPTION. Describe an outcome goal (an improvement in the condition of people served - such as health status, access to care, behaviors or knowledge - or in local service systems) that is specific, measurable, achievable, relevant, and time-bound (SMART). Below, enter a measurement as either a number or a percentage.

By March 31, 2027, CATCH will identify, assess, and enroll at least 18 high-need individuals—defined as those with multiple or severe health-related social needs that impede their health outcomes—into intensive case management services. During the funding period from April 1, 2026, to March 31, 2027, CATCH will document the follow-up and resolution status for each high-need enrolled individual to address their health-related social needs comprehensively. Progress will be tracked monthly and reviewed quarterly to ensure effective case management and improved health outcomes for the clients.

MEASUREMENT (number). Outcome to be achieved, expressed as a number. (OR, use the percent field below.)

18

MEASUREMENT (percent). Outcome to be achieved, expressed as a percentage entered as a decimal. (OR, use the number field above.)

Budget Information

BUDGET TEMPLATE. The form that follows this page is a budget template. Use it to enter the proposed budget for the requested funds, as well as the budget of project funds secured from other sources. For each budget category selected, enter line items that specify how the grant funds are intended to be used.

GRANT BUDGET ALLOCATION among APPLICANT and PARTNER ORGANIZATIONS. Partner organizations (for grants of \$20,000 or more) are an important component of the grant program, intended to have distinct, complementary and substantive project roles. As such, a portion of the grant award may be distributed by the applicant organization to the partners to perform specific activities and services. It is encouraged that the applicant and partners jointly discuss budget items when planning the application. On the budget page that follows, include all requested grant funds regardless of whether a portion will be distributed to one or more partner organizations.

Will any portion of the total grant award be distributed to one or more partner organizations, to perform specific activities and services?

- ☒ Yes
☐ No

Which partner(s) listed in the application will receive a portion of grant funds from the applicant organization, and in what amount(s)?

Houston Health Foundation	\$5,000.00	10%
University of Texas	\$5,412.00	11%
CATCH	\$3,500.00	7%
HCAAA	\$36,088.00	72%
TOTAL	\$50,000.00	100%

PROJECT FUNDING from OTHER SOURCES. List the names of other current and confirmed funders of this project, if any. The budget template will provide space to enter amounts from these funders.

N/A

PARTIAL FUNDING and ADJUSTMENTS to PROPOSED ACTIVITIES and SERVICES. The grant program cannot always award funding to successful applicants in the full amounts requested. Applicants considered for an amount different from the proposed budget will be asked to revise their budget and project activities.

Budget

Proposed Budget Summary

Expense Budget

	Grant Funded	Non-Grant Funded	Total Budgeted
Contract Purchase Services			
UTHealth	\$5,412.00	\$0.00	\$5,412.00
Subtotal	\$5,412.00	\$0.00	\$5,412.00
Travel			
HCAAA	\$1,560.00	\$0.00	\$1,560.00
Subtotal	\$1,560.00	\$0.00	\$1,560.00
Indirect			
Houston Health Foundation	\$5,000.00	\$0.00	\$5,000.00
Subtotal	\$5,000.00	\$0.00	\$5,000.00
Miscellaneous Expense			
CATCH	\$3,500.00	\$0.00	\$3,500.00
Subtotal	\$3,500.00	\$0.00	\$3,500.00
Personnel			
HCAAA	\$34,528.00	\$0.00	\$34,528.00
Subtotal	\$34,528.00	\$0.00	\$34,528.00
Total Proposed Cost	\$50,000.00	\$0.00	\$50,000.00

Revenue Budget

	Grant Funded	Non-Grant Funded	Total Budgeted
Grant Funding			
Award Requested	\$50,000.00		\$50,000.00
Subtotal	\$50,000.00		\$50,000.00
Non-Grant Funding			
Other Funding and Contributions		\$0.00	\$0.00
Subtotal		\$0.00	\$0.00
Total Proposed Revenue	\$50,000.00	\$0.00	\$50,000.00

Proposed Budget Detail

See attached spreadsheet.

Proposed Budget Narrative

Contract Purchase Services

Costs for contractual services (e.g., independent contractor, consultant) supporting performance of the project. Describe in the narrative.

UTHealth

"University of Texas - agreement to analyze data and generate reports (\$5,412.00)"

Travel

Costs for any local travel necessary for project activities and services. Can include mileage, public transit fare and other. Describe in the narrative.

HCAAA

" Parking: 2 days*\$15 maximum*52 weeks= \$1,560 per year 1-2 hrs \$9.00 and 2-3 hrs \$15.00 Zip Codes: 77023, 77036, 77051, 77009, 77033 "

Indirect

Indirect costs of no greater than 10 percent of the total request are allowable. Indirect costs include items such as rent, utilities, telecommunications, insurance, and clerical and managerial salaries and benefits (other than staff directly performing project activities, who are in Personnel). Describe in the narrative.

Houston Health Foundation

"Fiscal Agent - Houston Health Foundation 10% - \$5,000"

Miscellaneous Expense

Project costs not included in other line items. Describe in the narrative.

CATCH

Publication costs for resource materials

Personnel

Costs for staff salaries and wages (inclusive of benefits) for personnel directly involved in the project. In the narrative, list staff positions and their associated hours or full time equivalents for the project.

HCAAA

"Community Health Coach \$28 per hr x 8 hrs per week= \$224 X 52 weeks =\$11,648. To provide oversight of the Community Health Worker Temp Contract Employee - Community Health Worker Salary) Projected maximum \$27.50*16 hours per week*52 weeks)=\$22,880"
